

DataSheet

CATALOGUE #: 4LA7cc

PRODUCT NAME: **Monoclonal mouse anti-human lipoprotein-associated phospholipase A2 (Lp-PLA2), *in vitro***

MAbs: PL4cc, PL26cc, PL32cc, PL42cc, PL46cc
Hybridoma clones have been derived from hybridization of Sp2/0 myeloma cells with spleen cells of Balb/c mice immunized with recombinant human Lp-PLA2.

MAb isotypes: **IgG1** for MAbs PL4cc, PL26cc, PL32cc, PL42cc, PL46cc

Applications: Sandwich immunoassay, Western blotting
Recommended pairs for Lp-PLA2 sandwich immunoassay for detecting Lp-PLA2 in human serum and plasma (capture - detection):
PL42cc – PL46cc
PL26cc – PL4cc
PL32cc – PL4cc
MAb PL26cc reacts with Lp-PLA2 in Western blotting.

Purification: Chromatography on protein A Sepharose

Presentation: PBS, pH 7.4, 0.09 % sodium azide (NaN₃)

Storage: +4 °C (+2 ... +8 °C allowed)

Other information: We recommend to replace bovine serum albumin (BSA) with 1% casein as a buffer component or to use blocking agent for Lp-PLA2 immunoassay.
Blocking of the immunoassay plates with casein is needed to prevent non-specific binding of Lp-PLA2 to the surface of an immunoassay plate.

Material safety note: This product is sold **for research use only**. Standard Laboratory Practices should be followed when handling this material.
Product contains sodium azide as a preservative. Although the amount of sodium azide is very small appropriate care must be taken when handling this product.
